## **Multiple Wishlist**

Configuration and End-user instructions

User guide Version 1.0.0

With Multiple Wishlist, they can create multiple wishlists on the fly while browsing the products and manage their favorite products as per different categories. Once the list is created, the customer can easily share the same with friends and family. The Share Wishlist feature comes in handy when planning gifts for family members or friends, and for consulting on big purchases.

The extension is really profitable for all e-commerce platforms. Since the app allows the customer to manage their choices and future purchases more effectively, it increases the chances of converting them to sales.

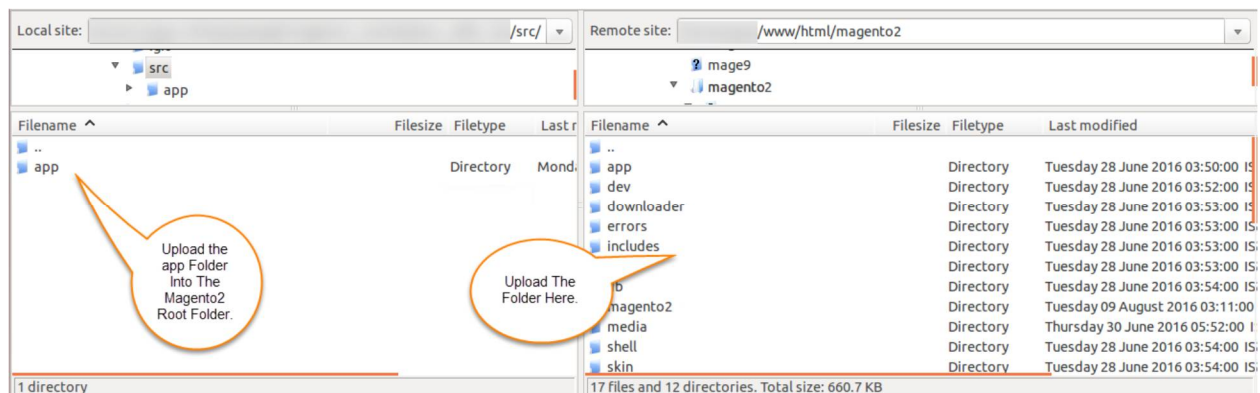

## Features:

- Allow customers to create multiple wishlists
- On-the-fly wishlist creation
- Ajax technology for faster process
- Wishlist sharing with friends and family
- Easily manageable
- Multiple wishlist management at the backend

## Installation

### Installation Process:

Multiple Wishlist for Magento2 module installation is super easy. You need to move app folder in Magento2 root directory that's it as per the screenshot.

After the successful installation, you have to run these commands in the Magento2 root directory.

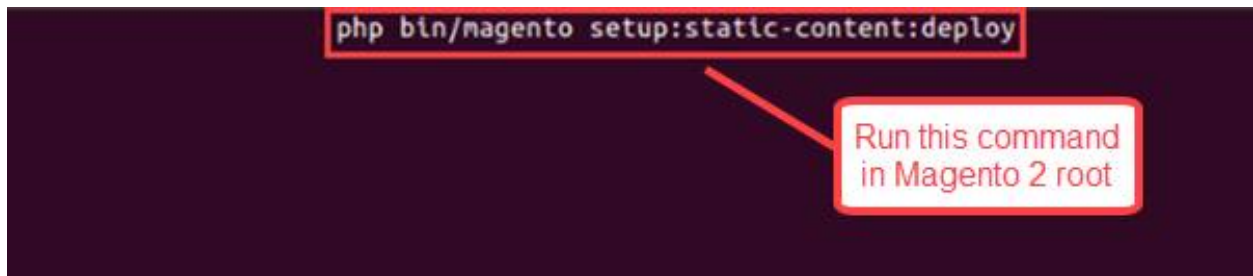

**First command- php bin/magento setup:upgrade**

**Second Command – php bin/magento setup:di:compile**

**Third Command – php bin/magento setup:static-content:deploy**

After running the commands, you have to log in to the admin panel and you have to clear the Cache. You can refer to the below screenshot.

## Cache Management

Q 🔔 admin ▾

Flush Cache Storage **Flush Magento Cache**

Refresh ▾ Submit 12 records found (12 selected)

Select all. Flush cache.

<input checked="" type="checkbox"/>	Cache Type	Description	Tags	Status
<input checked="" type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	DISABLED
