

Dotsquares Ultimate Site Maintenance mode

The time defined by admin will not vary according to time zone, so site will be in maintenance mode at the same time in allover world irrespective of the time zones. For example If I set the time period 1 hour for maintenance mode as per IST time zone (Site server time) then site will be in maintenance mode all over the world according to the IST time only. After this period site will automatically get live.

Admin settings:

| | |
|--|--------------------------|
| Enable [store view] | Yes |
| Allowed IPs [store view] | 192.168.1.10 |
| | IPs that can access Site |
