# WhatsApp Share

For Magento2

WhatsApp Share

This Extension allows you to share product details on Whatsapp contact list. There will be Whatsapp share button available on product detail page and it will work only with mobile devices having that are

having Whatsapp Installed. When user will click on whatsapp share button on the product detail page user will be redirected to Whatsapp contact list.

Then further user can share that product information (product name, product description, price and link of that product) to their contact list. Admin can easily enable/disable this Module on Product Page. This extension is easy to use and manageable without any technical proficiency.

Also please put down extension files in your custom theme if extension is not working from base directory.

**NOTE: WhatsApp Share button will only be visible in Real Mobile devices.**

WhatsApp Share Options and Setting

Store >> Configuration >> Dotsquares Extensions>> WhatsApp Share >> Enable Extension >> Yes
