ChatGpt

## Extension Overview :

The ChatGpt Extension is an useful tool for our users. The Extension will Integrate the ChatGpt AI tool with magento store admin. Automatically Content can be create by the admin for websites Block's, CMS pages, Categories and Products.

User now search any content for above entities using the text field. The Text field is appeared within the text editor of description and by clicking on button 'Get From ChatGpt' user can get the desired data in description box.

Also the admin can fill the description using the pagebuilder by clicking on the button 'Get From ChatGpt'.

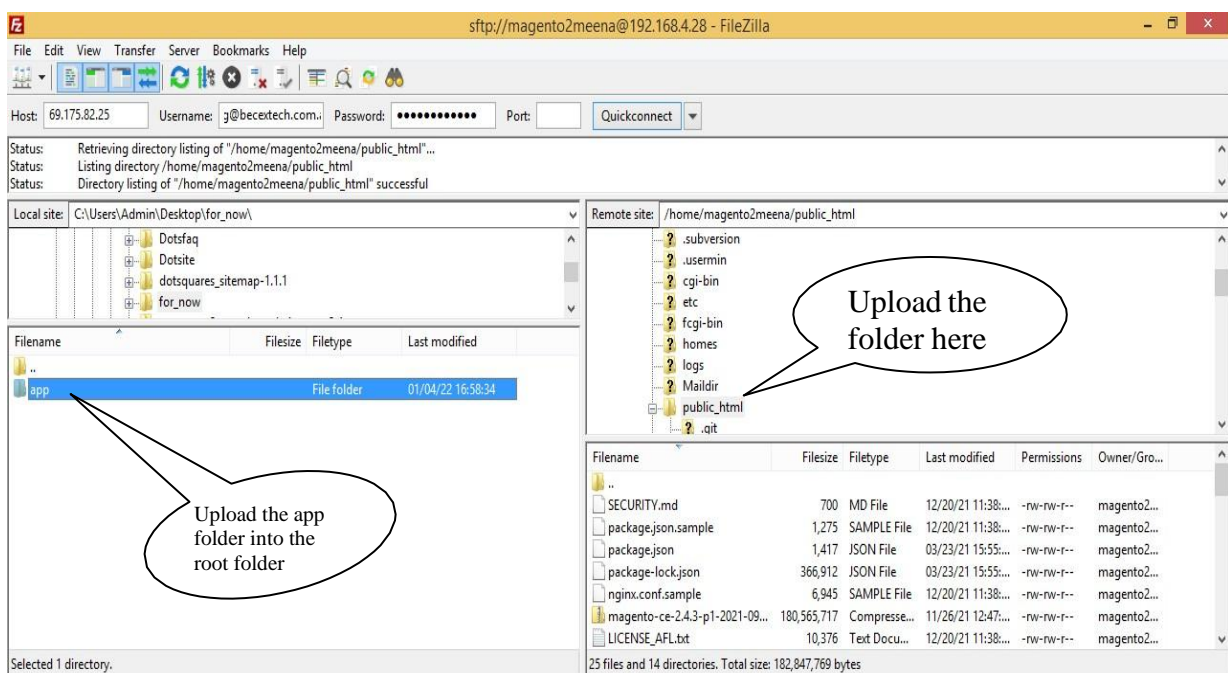

## Extension Features :

- The store admin can fill the description for products by typing custom query.
- The admin can also add the description with the pagebuilder.
- The store admin can add the description for categories with 'Get From ChatGpt' option.
- The admin can fill the description even if the pagebuilder is disable.
- The store admin can add content for block and cms pages as well using this option.
- The admin can change the status of the module and will not allow to go forward with empty api key field.
- Provide Simple Interface of Admin.
- Compatible With Magento Community 2.4 and Above

## Extension Installation :

### Installation Process

Taxswitcher, for magento2, module installation is very easy. You need to move 'app' folder in magento2 root directory as per the screenshot.

After the successful installation of extension, you need to run these following commands in magento2 root directory.

```
Php bin/magento setup:upgrade
```

Php bin/magento setup:di:compile

```
[magento2meena@ds23 public_html]$ php bin/magento setup:di:compile
```

Run this command in magento2 root folder

php bin/magento setup:static-content:deploy

```
[magento2meena@ds23 public_html]$ php bin/magento setup:static-content:deploy
```

Run this command in magento2 root folder

After running these commands ,you need to login to the admin panel and need to clear the Cache. You can refer to the below screenshot.

# 1. Add Product description

We can add the product description by searching relative information (Product name, Sku, Meta description, Meta title, Product Url etc.) in text field.

# 2. Add description using page builder

Admin can add the content for product using pagebuilder as well by clicking on “get from ChatGpt” button.

### 3. Add Description to category

Admin can add the description for categories by typing query in text field.

The screenshot shows the 'New Category' admin page. At the top, there is a 'New Category' header and a 'Save' button. Below the header, there is a note: 'Maximum file size: 4 MB. Allowed file types: JPG, GIF, PNG.' A placeholder for an image is shown with a camera icon and the text 'Browse to find or drag image here'. The main content area is titled 'Description' and includes a 'Show / Hide Editor' button, the category name 'Navratna Gemstone', and a 'Get From ChatGPT' button. The editor toolbar shows 'Paragraph' and '14px' font size. The text in the editor reads: 'Navratna gemstone, also known as the nine gemstones, is a set of precious stones that are believed to bring good luck, health, and prosperity to the wearer. These nine gemstones include diamond, ruby, emerald, sapphire, pearl, coral, yellow sapphire, blue sapphire, and hessonite. These stones are arranged in a specific sequence and set in a ring or pendant to achieve maximum benefits. Navratna is a popular choice for astrology enthusiasts and is believed to have a positive influence on the wearer's life in terms of financial, emotional, and physical well-being.' At the bottom, there is an 'Add CMS Block' section with a dropdown menu set to 'Please select a static block.'

### 4. Add content to CMS page

The store admin can add content for cms pages as well using this option.

The screenshot shows the 'Home page' admin page. On the left is a sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'Home page' and includes 'Back', 'Delete Page', and 'Save' buttons. The 'Content' section has a 'Content Heading' field set to 'Home Page'. Below this, there is a 'Show / Hide Editor' button, the content 'Home page html content for a toy website', and a 'Get From ChatGPT' button. The editor toolbar shows 'Paragraph' and '14px' font size. The text in the editor reads: 'Welcome to Toy Land' followed by a bulleted list: 'Home', 'Toys', and 'Contact Us'. Below this is the section 'Our Featured Products' with a placeholder for a product image labeled '150 x 150'. Underneath is a 'Toy 1' section with a paragraph of placeholder text: 'Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.' and an 'Add to Cart' button. At the bottom, there is a note: 'Note: Keyboard shortcut to activate editor help : Alt + 0 (Windows) or ~0 (MacOS)'.

### 5. Add content for block

The store admin can add content for block in required format like html.

**New Block** ← Back Save
