Extension Installation :

Installation Process

Ultimate Sitemap, for magento2, module installation is very easy.You need to move 'app' folder in magento2 root directory as per the screenshot**.**

After the successful installation of extension, you need to run these following commands in magento2 root directory.
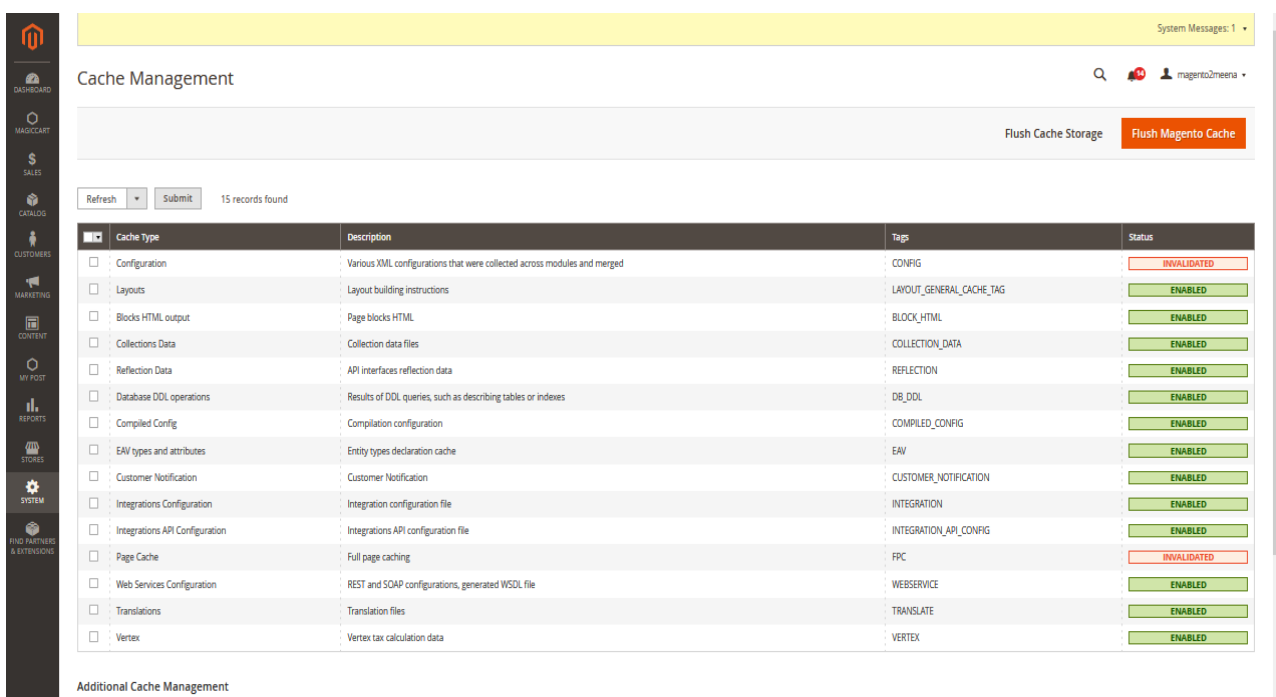

Php bin/magento setup:upgrade

Php bin/magento setup:di:compile

```
[magento2meena@ds23 public_html]$ php bin/magento setup:di:compile
```

Run this command in magento2 root folder

php bin/magento setup:static-content:deploy

```
[magento2meena@ds23 public_html]$ php bin/magento setup:static-content:deploy
```
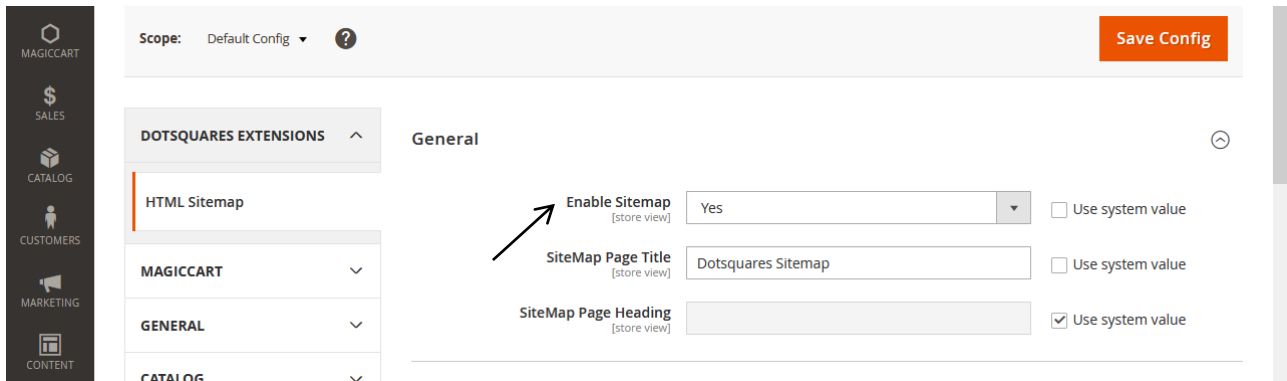

Run this command in magento2 root folder

After running these commands ,you need to login to the admin panel and need to clear the Cache. You can refer to the below screenshot.

Additional Cache Management

How will extension work in admin area :

After installation of the module, you need to enable module from back-end.

Below are the screenshots of Admin configuration. You can manage pages, categories and product links and their page title from there.

Frontend View :

To Display your sitemap you can either put '/sitemap' just after your sites main url or you can refer to the link in the footer with the name 'Sitemap Link'. Find the below Screenshot.

When you choose Category product dependent to 'No', front will display as following screenshot.

Else the front Display the categories followed by its products.
